Perko Door Closers

Perko is known as the original concealed door closer, and it is now available at Nob Hill. It offers an economic means of providing automatic

Perko closing for internal doors up to 110 lbs. Perko is finely constructed of solid brass anchor plates, powder coated mechanism housing and precision-engineered chain, all of which add to its appeal. These im-

pressive automatic door closers are available in Polished Chrome, Polished Brass, Satin Chrome, and Bronze Metal Antique. Light to Medium door closers come in both square and radius styles. The Perkomatics are available in radius styles only. They are also designed for light to medium use on internal doors up to 165 lbs. They are housed in a lightweight aluminum casing with a hydraulic mechanism that can be easily adjusted to provide the desired latching action for each application. The precision engineered chain ensures smooth and lasting service. Both are tested to withstand

500,000 closing cycles. The Perkomatic is also available in Polished Chrome, Polished Brass, Satin Nickel, and

Perkomatic

Bronze Metal Antique. Select finishes are now in stock at Nob Hill. For further information please call or stop in today and talk to one of our qualified sales associates.

Nob Hill Says Thank You, Good Bye, and Good Luck!

Back on September 9th, 1982, Brian Droen began his career as a professional locksmith at Floyd Total Security. This week, on September 9th, 2011, Brian will spend his last day with us as he ventures into retirement. Spending most of his career as a mobile service technician, Brian soon became one of the best all around people in the field. His duties included both residential and commercial installation, re-keying, hardware repairs, and

much more. Whenever there was a difficult installation, Brian was the technician who was sent to tackle the job. Nob Hill utilized Brian's services continually to install and repair hardware, especially the very complicated, ornate entrance pieces. It was well known that if Brian was sent to the job, the hardware would be installed/repared to perfection. His attention to detail, carpentry skills, and hardware knowledge are second to none.

This did not go unnoticed by customers who repeatedly requested him over the past 29 years. He would not only fix the problem, but his friendly and confident demeanor was reassuring for clients. Both Nob Hill and Floyd Total Security will miss Brian's skills, personality and attitude. We are grateful he spent his career with us. From all of us, we wish Brian, his wife June and their family the very best!
