Colonial Bronze going Green

Like many other manufacturing companies these days, Colonial Bronze is becoming increasingly concerned with the environmental impact that their operation is having on our environment. They have always been proud to provide an American made product with a lifetime warranty, and are very pleased that they can now add Certified Green to the list. Because Colonial Bronze products are made from 95% recycled brass, using these selections in your home or business will contribute towards earning a LEED certification. LEED is an internationally

recognized green building certification providing third party verification that a building or community was de-

signed and built using strategies aimed at improving performance across all the metrics that matter most... energy savings, water efficiency, CO2 emissions reduction, improved indoor environmental quality, and stewardship of resources and sensi-

tivity to their impacts. Benefits of going Green are:

- Improve air & water quality
- Reduce solid waste
- Conserve natural resources
- Contribute to overall quality of life

Nob hill is proud to carry a line of hardware that is design friendly and versatile, but above all taking strides toward becoming more eco-friendly. To see all that Colonial Bronze has to offer please stop by our showroom and talk to one of our experienced and knowledgeable Nobologists.

Wall Safes

All safes are not created equal. Nob Hill is dedicated to providing you

with a safe that will fit your protection needs. One option for securing valuables is the use of a wall safe. They offer convenient safeguard of

articles that may be used on a regular basis or that may need to be close at hand.

Our wall safes are designed for easy installation. Select models offer affordable burglary protection and may be equipped with a standard combination lock, key lock, or an electronic key pad lock. Some styles provide a thick solid steel door and protection of the lock against drill attacks. Others offer a spacious interior with an easy to use push button electronic lock for

quick entry. Most of our wall safes will also have a one hour fire

rating to protect your valuables in the unfortunate case of a fire. For more information on our wall safes, or any other safes we carry, please call or stop in today!
